

The students of Pallavan witnessed the experience of online quiz organized by the National Science Safety.

The aim was to increase awareness among children (between 10 to 18 years) about the science of safety and the behaviors that keep us safe. Participation in NSSC will have a broader impact by influencing peers, families, and society at large, thereby building a community of safety-conscious individuals.

Therefore to enhance their awareness among the students from class IX to XII (140 students) participated in the quiz. Every certificate generated simultaneously.

And the children received the certificate of participation after completing the quiz by NSSO.

The quiz was organized in Computer Lab and our IT specialist Mr Sher Singh Jhala helped a lot to conduct the exam.
