

Trees are very important to us in many ways. We cannot think of our existence without trees. Trees provide us with many food items, they prevent soil erosion and many kinds of medicines are prepared from trees. Above all, they help us to maintain ecological balances by supplying oxygen. To encourage the students and make them aware about the importance of trees, a **'Tree Plantation Programme'** was organised. Around 100 saplings were planted on this day. Students were led by their teachers and they enjoyed the experience.
