

On 06 April' 2019

April 7 of each year marks the celebration of **World Health Day**.

OBJECTIVE TO CELEBRATE THIS DAY [According to WHO]

‘Over the past 50 years this has brought to light important health issues such as mental health, maternal and child care, and climate change. The celebration is marked by activities which extend beyond the day itself and serves as an opportunity to focus worldwide attention on these important aspects of global health.’

World Oral Health Day is observed annually on every year, and launches a year-long campaign dedicated to raising global awareness of the issues around oral health and the importance of oral hygiene.

Maintaining good oral hygiene is one of the most important things we can do for our teeth and gums. Healthy teeth not only enable us to look and feel good, they make it possible to eat and speak properly. Good oral health is important to our overall well-being. To create awareness on the importance of dental or oral hygiene, an oral health checkup of the students of classes I to VI was organized on the World Health Day. Dr.Kaniska Kashyap from Sanjeevani Vyas Hospital, Jhalawar had visited and did oral checkups for the students of classes' first to fifth. He also prescribed to those students who were not orally fit.

The students were enjoyed the check ups and the positive message were spread among the students and their parents that oral hygiene is very important for the good health.
