

On 30.07.19

We want to make sure our students are well protected against measles and Rubella. Getting MR (measles, rubella) or MR (combined measles, rubella) vaccine provides the best protection against measles and rubella. All students out of (in numbers) **578 total 520** students had been vaccinated and had attended the school ,some of them came with their parents and their parents brought them back after vaccination.

And the report for the above has been sent to the district education department and health department on the same day.

The MR vaccination for junior school, Patan branch has been done on 08.08.19 successfully.

Total 26 students have been vaccinated out of 26 on the same day.
